Website QA report

HELIOS · demo site

Date: 2026-10-30

97 HEALTH SCORE	0 Critical	0 High	0 Medium	3 Low

1 pages · 3 screen sizes · 1 links checked

Executive summary

We found 3 problems: 0 critical, 0 high, 0 medium and 3 low.

No critical or high problems were found: the site is in good shape.

Recommended order: critical items first, then high, then the rest in the next update.

Fix these first

LOW Check by hand: accessibility

`Elements must meet minimum color contrast ratio thresholds`

Where: /portfolio-web/helios/

How to fix: The checker could not decide (for example text over an image or gradient). Look at these elements yourself, or with a contrast picker.

Estimated fix: 5–15 min

LOW No robots.txt

Where: /portfolio-web/helios/

How to fix: Add a robots.txt at the site root that points to the sitemap.

Estimated fix: 10–15 min

LOW No sitemap.xml

Where: /portfolio-web/helios/

How to fix: Publish a sitemap.xml (most CMSs and SEO plugins generate one) and submit it in Google Search Console.

Estimated fix: 15–30 min

All findings

Critical · 0

No problems found in this category.

High · 0

No problems found in this category.

Medium · 0

No problems found in this category.

Low · 3

LOW Check by hand: accessibility

`Elements must meet minimum color contrast ratio thresholds`

Where: /portfolio-web/helios/

How to fix: The checker could not decide (for example text over an image or gradient). Look at these elements yourself, or with a contrast picker.

Estimated fix: 5–15 min

LOW **No robots.txt**

Where: /portfolio-web/helios/

How to fix: Add a robots.txt at the site root that points to the sitemap.

Estimated fix: 10–15 min

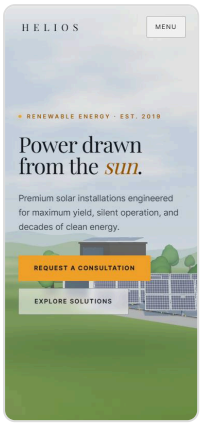

LOW **No sitemap.xml**

Where: /portfolio-web/helios/

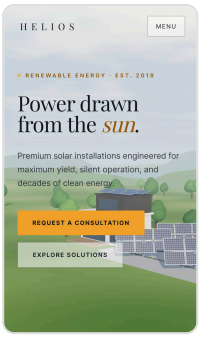

How to fix: Publish a sitemap.xml (most CMSs and SEO plugins generate one) and submit it in Google Search Console.

Estimated fix: 15–30 min

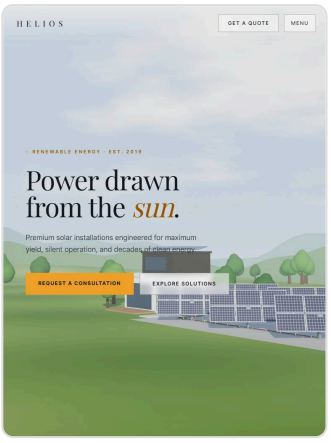

The home page on four screens

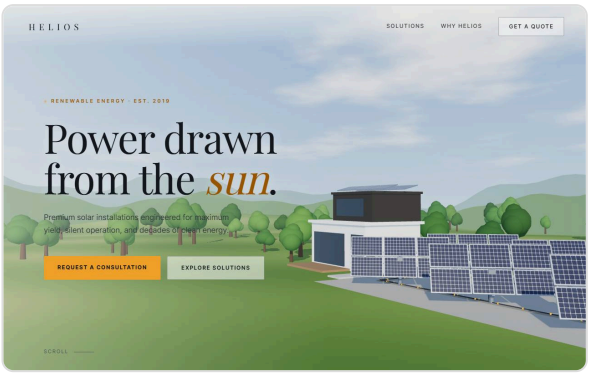

Phone · 375 px

iPhone · Safari engine

Tablet · 768 px

Desktop · 1280 px

Pages checked

Page	Status	Largest paint	Layout shift	Weight	Requests
/	200	0.4 s	0.00	0.4 MB	17

Next steps

This report shows what needs attention. If you like, we can fix it and keep the site healthy.

Diagnosis

US$ 60

This report, for up to 10 pages.

- Three screen sizes
- Accessibility, speed and links
- Priorities and how to fix

Fixes

from US$ 100

We fix the critical and high items in this report.

- Fixed quote per item
- A new report after the fixes
- Nothing changes without your approval

Monitoring

US$ 30 / month

Automatic check every week.

- Alert when something breaks
- Monthly report
- Cancel any time

Prices per site. Online stores can add a checkout test, quoted separately.

How this report was made

Each page was loaded in a real Chromium browser at 375, 768 and 1280 px. The report records console errors, failed requests and sideways scrolling; checks accessibility with axe-core (WCAG 2.1 A and AA rules); measures Largest Contentful Paint, Cumulative Layout Shift and page weight; reads titles and descriptions; and requests every link found. The first pages were also opened in WebKit (the engine behind Safari) as an iPhone, and in Firefox. A first visit with no consent given recorded which trackers load and which cookies are set. Fix times are estimates for a developer who knows the site. robots.txt was respected and no form was submitted.

> Automated checks find many problems but not all of them. This report is not a legal accessibility, privacy (GDPR/LGPD) or compliance certification.
